Re: CIMCO REFRIGERATION

The City of Richmond has been asked to provide a general letter of acknowledgement and recommendation to CIMCO REFRIGERATION and is pleased to do so.

CIMCO are well known to the City for their expertise in the construction of refrigerated sporting facilities. CIMCO has an excellent reputation for reliability and professionalism worldwide.

CIMCO is contracted to the City to provide the refrigeration plant for the Richmond Oval, which will be used for the Vancouver 2010 Olympic Games in British Columbia, Canada in addition to providing the same services on other ice skating surfaces in Richmond. This facility will be complete early next year, well in advance of the Vancouver 2010 Winter Olympic Games. This project will be completed on time and on budget. The success of this very considerable construction undertaking is in no small part due to CIMCO's contribution.

The City and its experts would be pleased to provide further information and would be available to comment on technical matters and the role CIMCO played in design and construction of this artificial ice surface and refrigeration service.

Please do not hesitate to call me at 604.276.4372 for further information.

Yours truly,

Greg Scott, P. Eng., LEED A.P.
Director, Major Projects
